<sup>1</sup>including 20 mm pull-out (tol. -8; +30 mm)

<sup>2</sup>cylinder is delivered including oil inlet swivel adapter and cup

## specifications

total stroke <sup>1</sup>	2380 mm
dry weight cylinder only	106 kg
total volume	33.6 L
working volume	30.9 L
maximum pressure	220 bar
maximum pump flow	23 l/min
maximum allowable thrust first stage <sup>2</sup>	20.0 ton
oil inlet	3M <sup>1</sup> BSP

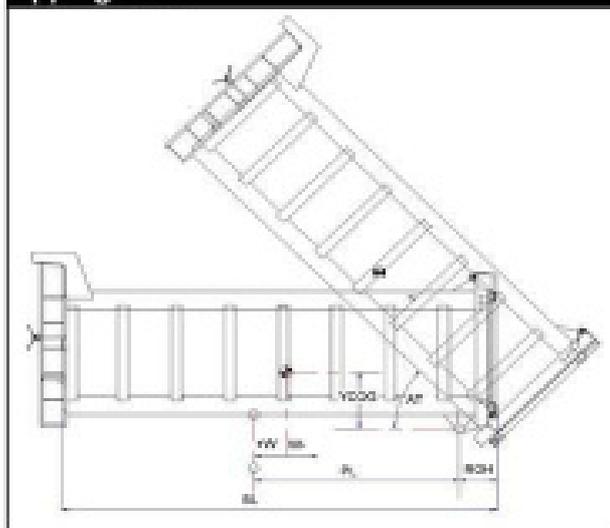

## technical notes

This cylinder is a lifting device only and may not be used as a structural member or be subjected to side load. Sideload and/or poor alignment might result in cylinder leakage. Hyva therefore strongly recommends the use of a cradle, even in instances where the cylinder only tips to the rear or to the side. The cylinder is painted black RAL9005. For suitable hydraulic oils, please refer to data sheet OIL-0011. For details of available brackets and cradles, please refer data sheet 0168RA05.

Detailed calculations can be made using the HYVA Tipper Program, freely available from [tipper.hyva.com](http://tipper.hyva.com).

<sup>2</sup>The cylinder thrust on the first stage (from the HYVA Tipper Program) must not exceed the maximum allowable (see specifications above).
